

Update, 16 October:

- The second infected healthcare worker in Dallas, Texas, US had flown the day before testing positive for Ebola. Prior to flying, the nurse had called the CDC and reported that she had an elevated temperature but no other symptoms. Since she did not meet the temperature threshold for fever she was told she could fly commercially. The woman flew Frontier Airlines flight (number 1143) from Cleveland, Ohio back to Texas. The CDC is now asking all passengers on that flight to contact them at 1-800-CDC-INFO. The lack of other symptoms, such as vomiting or diarrhea, means the risk of transmission to fellow passengers on Frontier flight 1143 and passengers on subsequent flights on the same aircraft is quite low.
- In a response proportionally greater than its wealthier counterparts, Cuba has sent 165 healthcare workers to Sierra Leone and another 296 are going to Liberia to help contain the virus. Cuba also has professionals on the ground in Guinea.
- British army medics will run a hospital in Sierra Leone to treat infected healthcare workers. A total deployment of 750 military personnel is planned to be sent to West Africa.

Clinics and Facilities Status in Affected Areas

Healix is in direct communication with those medical facilities that are still operating in the impacted regions. Please contact Healix directly for further information on the readiness of medical facilities in these areas.

Country Travel Advice Status

Sierra Leone: Warning Level 3 - Healix Recommend "Avoid Non-Essential Travel"
 Guinea: Warning Level 3 - Healix Recommend "Avoid Non-Essential Travel"
 Liberia: Warning Level 3 - Healix Recommend "Avoid Non-Essential Travel"
 DRC: Alert Level 2 - Healix Recommend "Practice Enhanced Precautions"
