

Ebola Update: 24 November 2014

- An Italian doctor has contracted Ebola in Sierra Leone and will be flown to Rome for treatment. The Italian Health Ministry has said the doctor will be transported late today to Rome's National Institute for Infective Diseases on a military plane.
- The United States' Food and Drug Administration (FDA) announced it is stockpiling plasma from Ebola survivors to treat future patients. The plasma will be treated with a pathogen inactivation system, Cerus Corporation's Intercept system, to ensure no other harmful diseases, such as malaria, are transmitted to the patient.
